

Ansible Adhoc to task for playbook

Thursday, February 3, 2022 02:58 PM

```
$ ansible atlanta -m copy -a "src=/etc/hosts dest=/tmp/hosts"  
// command is working
```

Converted into task inside playbook

```
.yaml  
#task single  
• Name: 'copy file'  
  copy :  
    src: /etc/hosts  
    dest: /tmp/hosts
```

Playbook - somefile with .yaml / .yml
-> play
 -> tasks
 work we need to perform on nodes ?

Quick check adding inside my playbook.

Ansible command line facility - Adhoc - command
