

Lab- Create very first image with docker file

12:20 PM

```
// To create your image you should have dockerfile
#to go to root user $ su -i

#create nested folder with -p $ mkdir -p /docker/simple

# $ cd /docker/simple

$ touch Dockerfile
$ gedit Dockerfile

FROM ubuntu
CMD ["echo", "Hello from THBS"]
```

Save and exit

To create image from Dockerfile

```
# $ docker build -t "thbs_demo" .
$ docker images
-----
thbs_demo -----
$ docker run thbs_demo
```

Build Ship Run
