Qlik-Sense - Data Labs

Wednesday, February 23, 2022   11:43 AM

What:
Tool Analytic tool any person can use.

Why:
- It very easy use
- Support to load data from multiple sources or simple load you data from local computer
- You can create reports or visualizations out of complex, huge data very easily
- You will able to filter data (relative filtering)
- You can create multiple chart or reports on same data.. Easley with any underlaying code writing
- AI - Suggestion provided out from out.

How
1. create you qs app
2. Load data by Data Manger (GUI) / Data Editor (SCRIPT based)
3. You build data model out date -- data cleaning, join, concat of data
4. You start building you reports or charts..
5. Create create report on mutiple sheets
6. Once all work done, you preper presentation to you **Business Owner**

Where:
Big data analysis or complex data analysis with any technical

--
1. Athlatics_event
2. DP_Live

- We join table to get matched records from both table
- Inner join...

Load data --> form final data model

-> sheet -> create new sheet
-> start editing sheet, -> diff chart, plotting, data display, KIP
-> Add more sheets and more analysis

You present this data to BO / Management
- Storytelling, you add your screenshot from sheets,
- Add TEXT
- More slide

Sheeting data analysis --> if we want to integrate inside existing app
