Connect to Linux machine

Friday, February 18, 2022   03:37 PM

Open an SSH client.

By cmd of windows machine

Open an SSH client.
Locate your private key file. The key used to launch this instance
is demo-key.pem
Run this command, if necessary, to ensure your key is not publicly
viewable.
 chmod 400 demo-key.pem
Connect to your instance using its Public DNS:
 ec2-3-110-81-197.ap-south-1.compute.amazonaws.com
Example:
 ssh -i "demo-key.pem" ubuntu@ec2-3-110-81-197.ap-south-
1.compute.amazonaws.com

Ssh -i "demo-key.pem" ubuntu@3.110.81.197
