Lambda Integration with ALB

Thursday, March 3, 2022   01:03 PM

1. Will create sample Lambda function with any run -- (node js)
- Give name of Lambda function, choose run - create

Where you are invoking Lambda from ALB -- it expecting repose
of specific format
https://docs.aws.amazon.com/lambda/latest/dg/services-alb.html

```
{
   "statusCode": 200,
   "statusDescription": "200 OK",
   "isBase64Encoded": False,
   "headers": {
      "Content-Type": "text/html"
   },
   "body": "<h1>Hello from Lambda!</h1>"
}
```

2. Will create Load Balancer -- Application -- //
    --- will create target group for Lambda
    -- give name Lambda to invoke by ALB -- DNS name
1. Will take url / DNS of ALB -- will should be able see response
    from Lambda FN

Timeout error - SG added ALB did allowed traffic on http : 80

Lister -->

Rules ===
    //   -> return fixed repose
    //surekha -> Lambda
    //support -> EC2
